

SIMULATION & 3D ANIMATIONS REALISTIC RENDERING

TYPES OF SERVICES

- Computer-generated imagery for showcasing equipment, structural materials or buildings,
- Project submissions,
- Real-time 3D exploration,
- Mechanical process simulation with cinematic animation,
- Industrial process simulation with integration into the relevant environment,
- Project technical reviews,
- Technical briefings and associated summary reports.

TYPES OF WORK

- Assembly and disassembly animation,
- Cinematic animation,
- 3D walk-through animation,
- Simulation animation,
- Catalogue stills on white background,
- Integration of stills into a single photo,
- Stills to showcase internal and external architecture,
- Preparation of 3D models and material / texture combinations,
- Preparation of various designs and materials for 3D components.

SECTORS

- Transportation (aeronautical, automotive, railway...),
- Building and Public works,
- Energy (oil & gas, naval, nuclear...),
- Environment (water, waste...),
- Industry (food industry, pharmaceuticals, cosmetics, chemistry and special machines ...),
- Amusement park.

ANIMATION SOFTWARE

- 3DS MAX DESIGN,
- SHOWCASE.
